

Osmolive

(WiFi Power Strip)

1. Use your WiFi to control your home devices

that have a power plug (Lamps, TV, Home Theater, Printer, etc.) using your smart phone or voice (on a smart speaker such as Amazon Echo Dot or Google Home Mini).

2. Program your home devices

to turn on/off based on preset conditions or at specific times during the day.

(For eg.: Turn off all lamps at sunrise)

3. Centralized, Integrated Control

Turn your home devices on/off as a group with other devices when you are entering/leaving home.

(For eg.: Turn off lamps, TV, Home Theater, Iron, etc. along with other devices when the voice command of "Goodbye" has been given)

4. Save energy

by effortlessly ensuring your home device is turned off when you are not using it.

5. Access your home devices

from anywhere in the world with an internet connection.
