

OSMOSTAT

(WiFi Thermostat)

1.

Use your WiFi to control your AC

using your smartphone or voice (through a smart speaker such as Amazon Echo Dot or Google Home Mini).

2.

Program your AC

to turn on/off or preset temperature at specific times during the day.

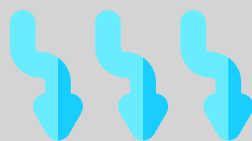

(For eg. Turn off Hall AC at 1am in the morning and turn it on at 8am in the morning)

3.

Centralized, Integrated Control

Turn your AC on/off as a group with other devices when you are entering/leaving home.

(For eg. Turn off AC along with other devices when the voice command of "Goodbye" has been given)

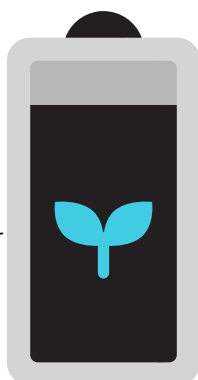

Goodbye

4.

Save energy

by effortlessly ensuring your AC is turned off when you are not using it.

5.

Access your AC

from anywhere in the world with an internet connection.
